# Prepare Short Report

**Report Format (Example in Times New Roman):**

**Title:** Packet Capture and Protocol Analysis using Wireshark

**Objective:** To capture live network traffic and analyze common protocols.

**Steps Taken:** Installed Wireshark, captured packets, filtered by protocols, exported file.

**Protocols Identified:** HTTP, DNS, TCP

**Findings:** The captured data showed requests to websites, DNS queries for resolving domain names, and TCP packets for establishing connections.

**Conclusion:** Wireshark is an effective tool for analyzing and troubleshooting network communication.
